Essential civic education textbook pdf download

To participate is one of the core skills in the nowadays digital society. Participation means to be in the position to gather information, reflect them and articulate opinion. Participation inherent the ability to conceptualize information and put them into different context. Transferring participation into education means to educate self-aware citizens, who are open to new ideas, cultures and concepts and who are willing to form and influence actively their society. Therefore it was beneficially to create curricula, which had a European perspective on citizenship and participation. Still each country inside the EU has different approaches which never have been brought together at the European Level. Educitizens is based on 3 fundamental pillars – participation, citizenship and empowerment – and the share of smart practices in educational field – formal or non-formal. It is thus important to define what those concepts mean for the project.
